

# BLUE OX1100

## 1100 CFM Media Filtration System With 1/3 HP Direct Drive Fan

The BLUE OX1100 provides clean air for offices, meeting rooms, bowling centers, cocktail lounges, bingo halls, clubs, computer rooms, and more. Utilizing only the highest quality components housed in a heavy-duty 16 gauge steel cabinet and finished with chemical resistant paint, each unit is a self-contained system for use individually or in groups. Low initial price and daily operational and maintenance costs are far less than more expensive electrostatic air cleaners, making our OX1100 system cost effective for any size installation.

### How the OX1100 Works

A large centrifugal type blower draws the contaminated air from the room through a set of highly efficient micro-glass filters that separate the sub-micron particles from the air stream. The cleaned air is then discharged back into the room for reuse. No ductwork is required, and there is no loss of heat or air conditioning. Optional charcoal filters are available for odor control and a HEPA type filter is available for those areas which demand the ultimate in clean air. A number of filters are available for specific problems.

### Installation

Installation of your new OX1100 may be accomplished in a variety of ways. The OX1100 is designed for chain-hanging, rod-mounting, or a wall bracket installation to suit your individual application. The OX1100 operates on ordinary 115 Volt circuits and requires no special wiring.
