

OX3200-2x2 Unit

3200 CFM Media Filtration System
3/4 H.P. Direct Drive Fan

The Blue OX3200 unit was developed primarily for larger installations where there is a heavy contamination load and a lot of area to be cleaned. These multi-unit setups have higher filter cloth-to-air ratios, resulting in a significant savings in maintenance and less overall units required. Our 2x2 Units have 4x the filter surface area of a single unit, resulting in over three times the filter life. The OX3200 filter systems can be used for any application where contaminates, mist, or smoke is created. Additional unit set-ups, cabinet and filter options available. All units have a Three Year Warranty on all parts besides filters.
