

# OX3500C-CF Unit

3500 CFM Media Filtration System  
2.0 H.P. TEFECC Single Speed Fan

The BLUE OX3500C has been engineered with a 16-gauge Cold-Rolled steel cabinet, finished in a Polyester Powder Coating Paint. The OX3500C air cleaning system has a number of distinct advantages over conventionally designed units. Featuring a "T" pattern airflow unit with inlets on both ends and exhaust in the middle, a dual set of micro-glass fiber disposable filters provide more filter area and allow the unit to operate with considerably less static pressure. The lower airflow - to - filter ratio provides higher efficiency and longer life. Silencers and mounting kits available. The CF Model also includes a 2" thick Carbon After Filter for mild odor control. A Three Year Warranty included on all parts besides filters.
